

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

- Gone through the SRS document and explore about Admin module and created pages like manage members, manage country, category, type, spam reports, system configuration, etc.
- Learn about Git and Git Bash and push the work done
- Done the environment setup for an installation of Visual Studio 2019 and SQL Server.
- Learn MS SQL Server and started database design.

Reason for incomplete work:

Plans for next week:

- Go through the SRS document and create database design accordingly.
- Start exploring about MVC and components.
- Do environment setup for Visual studio and install necessary components.
