

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

1. Learn about Routing which includes mapping between patterns and combination of Controller + Action + Parameters and check the Routing rules.
2. Explore ActionResult which is a result of action methods or return types of action methods and check its types.
3. Learn about Validation and use different DataAnnotations in it.
4. Complete admin side pages in razor view.

Reason for incomplete work:

Plans for next week:

1. Learn about Object/Relational Mapping (O/RM) Framework which includes Entity Framework
2. Explore Learning Database with MVC
3. Compare Code First and Database First approaches.
4. Create Authentication pages Signup and Login page with Database interaction.
