Project Title: NotesMarketPlace

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

- Gone through the SRS document and explore about User module.
- Created the pages of User side which includes user profile, search notes, user download notes, user rejected notes, etc.
- Check dependencies between pages given in SRS and redirect accordingly.
- Create a repository and push the work done.

Reason for incomplete work:

Plans for next week:

- Go through the SRS document and explore about admin pages and start the design for admin side pages.
- Learn about Git Bash and commands.
- Start learning Database designing.
