Project Title: NotesMarketPlace

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

1. Check the complete Database design and change in the Database design as per the guidance given by the external guide.
2. Learn about MVC architectural pattern: Model (logic for application) – View (Visual representation of the model) - Controller (handle all user input).
3. Explore about Razor Syntax. Razor view with visual basic syntax has .vbhtml file extension and C# syntax has .cshtml file extension.
4. Convert all User side pages in razor view.

Reason for incomplete work:

Plans for next week:

1. Explore about Routing.
2. Learn about Action Result.
3. Learn about Validation.
4. Convert all Admin side pages in razor view.
