Project Title: NotesMarketPlace

WEEKLY REPORT

Work done in last week (Attach supporting Documents):

- We have given SRS (software requirements specification) which includes the whole project details. We need do go through it.
- It specifies that it includes two main components: User and Admin. And Login component which is similar in both.
- We have done environment setup for Brackets tool and install necessary extensions for the same.
- We have done set up for Fonts, Colors & Icons.
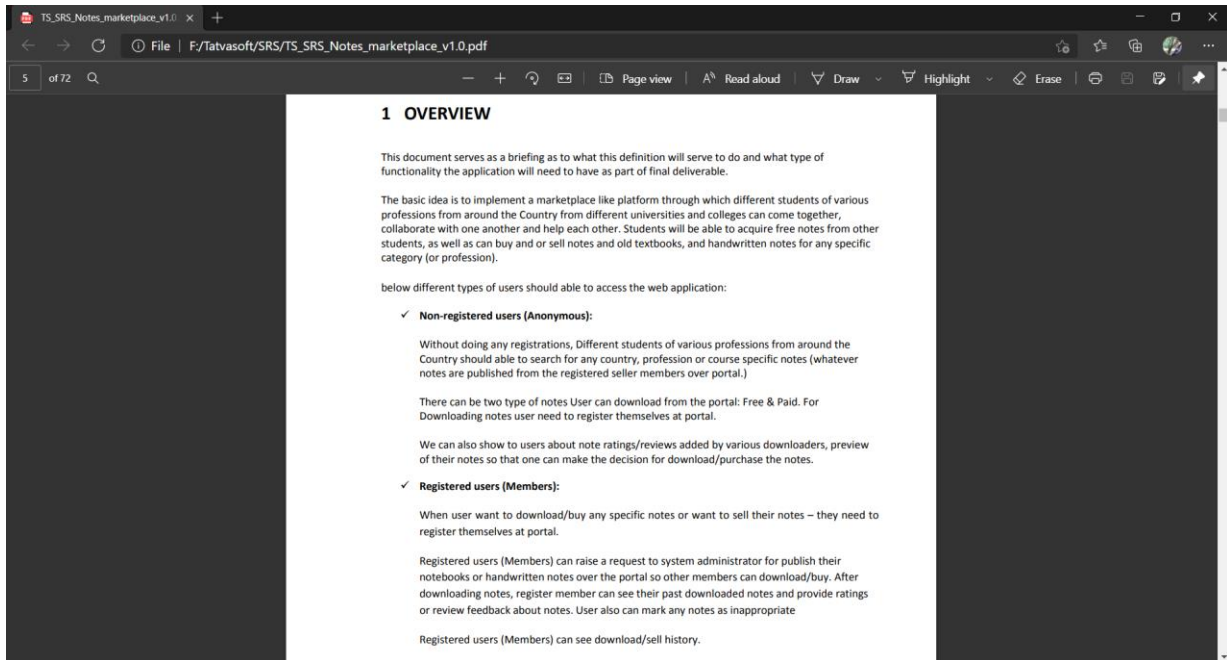

Reason for incomplete work:

Plans for next week:

- Learn about CSS basic.
- Explore JavaScript and jQuery.
- Add necessary bootstrap in the project.
- Create Login module and Home module.
